

STUDY PROGRAM BIOMECHANICAL ENGINEERING

Welcome to BiME!

With the launch of the new Master's program *Biomechanical Engineering*, we **welcome our new students** to start their studies this winter semester 2022/23.

We are glad to have more than 60 enrolled students from 8 different countries. We wish you a pleasant start at the Faculty of Mechanical Engineering at Otto von Guericke University and in the student city of Magdeburg.

Our interdisciplinary master's program will provide you with expertise in mechanical engineering, medicine, biology and kinesiology to develop medical assistance system, devices and implants in the future.

Enjoy your studies, be curious and inquisitive, ask lots of questions, and appreciate learning.

If you have any organizational questions, please contact your student supervisor Maria Herbster via Mail (<mailto:bime@ovgu.de>) or talk to me in my lecture.

We are looking forward to an exciting semester and an interesting cooperation with the medical campus.

Kind regards,

Prof. Dr.-Ing. habil Thorsten Halle

Decan of the Faculty of Mechanical Engineering
